**CHRONIFI IS A BLOCKCHAIN-BASED
NFT ADVENTURE GAME WITH A 2D
TURN-BASED AND 3D MMORPG**

OUR VISION & MISSION

VISION

1. Build and Attractive CHRONOFi Metaverse that attracts a large number of GameFi players to the Polygon Ecosystem, which is in order to make them explore Galaxy and enjoy every feature.
2. Design a healthy & rewarding dual token system for regular crypto users via play-to-earn mechanics that ensure the longevity of the game.
3. Create an esport atmosphere in CHRONOFi 3D Metaverse with CHRONOFi Championship featuring KOLs streaming for the tournaments & benefit for the attendee
4. CHRONOFi strongly believes that in the near future, the blockchain-based Play-to-Earn market will grow exponentially and become one of the major pillars of this digital era. With CHRONOFi, we hope that the increasingly strong Blockchain-applied financial market will reach even further, finding its way to every corner of the world

MISSION

1. CHRONOFi carries the mission to build a groundbreaking project, in which players can benefit from their participation and investment, towards a mutual sustainable future.
2. CHRONOFi carries the mission to enact the movement of a huge wave of traditional market players to the NFT market, which promises to make the crypto market ever more competitive and dynamic.

WHAT IS CHRONOFI ?

CHRONOFI is a blockchain-based NFT adventure game with a 2D turn-based and 3D MMORPG Play-to-Earn, where anyone can earn tokens through skilled gameplay and contributions to the ecosystem. Players can battle, collect, and build a robot. Allowing community developers to build their own tools and experiences in the CHRONOFI.

While CHRONOFI is a fun game, it's also taken on characteristics of a social network and jobs platform due to the strong community and play to earn opportunities that have come from its early success.

Different from the existing competitors is Many of the NFT game released last year was a product of 'Tech' people. They have experience and knowledge in blockchain 'more' than they have in gaming. The result was mediocre games with very simple game play on 2D and we Inside 3D Game featuring open world games.

Unique :

- ▶ **Innovative combination** between **Play-to-Earn and Metaverse** built cleverly upon an engaging story and plot.
- ▶ **AI personalization** tech allows users to upload their photos and create **unique digital avatars**.
- ▶ There is the ability to **engage with crossover characters** from other universes such as Mecha or other

BUSINESS MODEL & TOKENOMICS

CHRONOFI TOKEN

CHRONOFi as a currency for Buying and Selling NFT, it built on Polygon Network in accordance with Polygon standard for tokens, CFC can be bought and sold or traded for other digital currencies. CFC can be stored in supported crypto wallets such as MetaMask.

CHRONOFIGAME

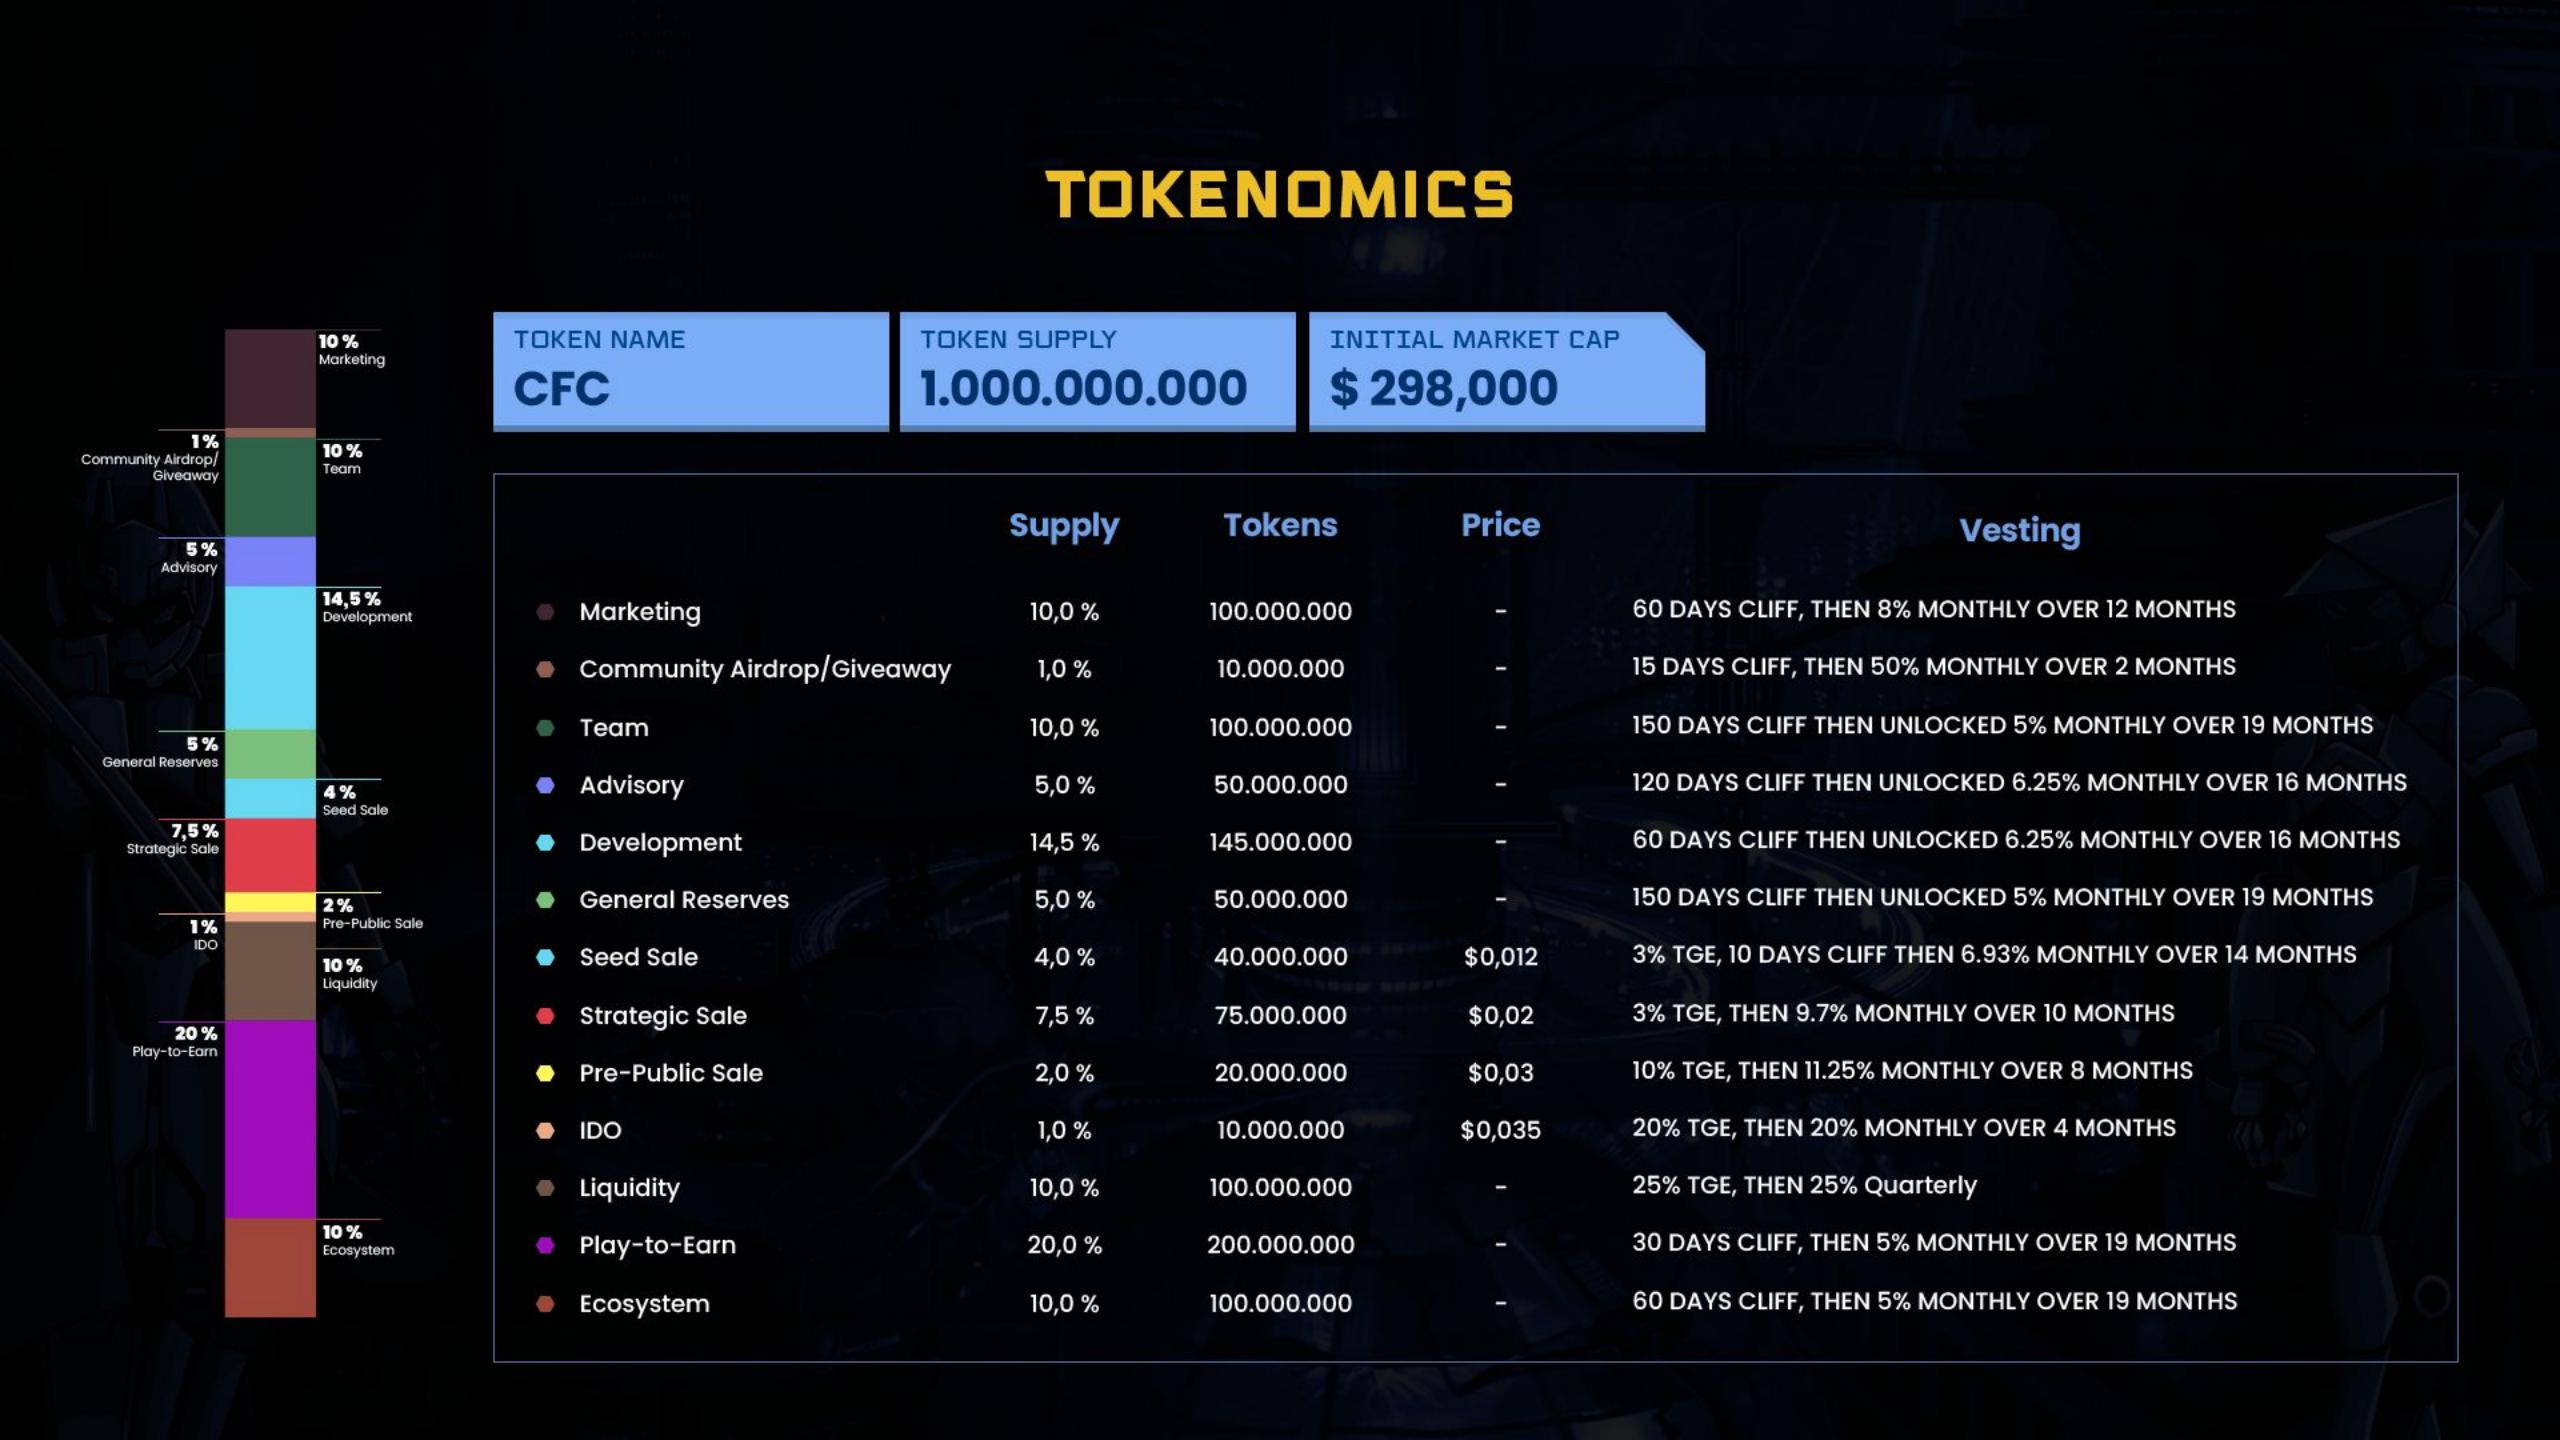

CFCg is an in-game used token, it's NOT a crypto! Like other free-to-play games, sped time to earn CFCg Coin

WHY CHRONOFI WILL SUCCESS?

1. **Low barrier entry** : A Starter pack only cheap costs
2. **Scalable system** : Anti-Ponzi system plus new gameplay modes are constantly being developed.
3. **Strong Community**

SAULIDITY

CHRONOFI team is composed game developers from Indonesia with years of experience creating games with stunning visuals and addictive gameplay.

Our ambition is to build a leading NFT Ecosystem in the blockchain space that delivers sustainable values to users and investors. We come from a traditional gaming market, but as we discovered NFT Technology and its implications on the gaming industry, We now have the ambition to incorporate NFTs into gaming to bring users the best gaming experience.

Our philosophy is to focus on user experience, to bring them the smoothest and most satisfying games in the blockchain world.

DISCLAIMER

It is important to understand that you are utilizing the site, app, or smart contracts at your own risk. There may be errors in these products which could cause damage and hurt either yourself or someone else who uses them! We cannot guarantee their safety but they will try our best so please think carefully before using them – we aren't perfect after all.

The Site, the App, and Smart Contracts may not be suitable for your needs. Without limiting the generality of what we've said above about our site being available to you without interruption or error; we don't represent that everything on there will suit all requirements – because it isn't possible! We also cannot ensure: your access (or use) is uninterrupted – timely nor free from errors in any way whatsoever, either while browsing through pages/ content at home using a desktop computer browser. The reason for this – some jurisdictions do not allow the exclusion of implied warranties in a contract with consumers.

You agree to the inherent risks of doing business online, but we are here for you. This includes providing a secure network that protects your information from potential breaches or hackers who want access in order to steal sensitive data such as passwords and credit card numbers!

Users should always make sure that their private keys are backed up and not stored anywhere unless they're willing to take full responsibility for the consequences. It's also a good idea if you can update personal informational passwords, as well as the app and OS regularly since newer versions will fix any security holes in their software. Reality Sviesus projektai, LLC can be seen as an asset that exists only by virtue of its own record maintained on a network. All smart contracts are conducted and occur within this system, where they interact with other app owners to transfer resources between each other based on certain rules programmed into their code.

Sviesus projektai, LLC has no control over the smart contracts on the blockchain networks or any other feature of our platform. We cannot be responsible for losses due to blockchains and electronic wallets used with this game. So even though it's not possible now, as a matter of fact, these things happen sometimes. Any fund losses may still come up eventually because there is the possibility of occurring problems within the blockchain network like forks in technology nodes.
